"If you think the government loves you or created the Covid shots for your health, take the blue pill, close this report and believe whatever you like. If you think something is wrong with the Covid narrative or shots, take the red pill, proceed with this report and see how far the rabbit hole goes. Just know information in this report may cause mental or emotional distress."

*COVID-19 stands for coronavirus disease of 2019.
*COVID-19 is also referred to as COVID or Covid.
*Vaccinated is also referred to as vaxxed.
*Unvaccinated is also referred to as unvaxxed.
*Vaccine is also referred to as shot.
*For familiarity, this report uses the word 'vaccines,' even though many doctors in this report identify them as gene therapies.

MOCK PANDEMICS THAT BECAME TRUE

Event 201 was a high-level pandemic exercise that occurred in New York City a few months before the pandemic started. Coincidentally, the mock exercise involved a novel coronavirus outbreak. All the major players attended, including the Bill and Melinda Gates Foundation, Johns Hopkins University and Klaus Schwab's World Economic Forum.

<https://www.centerforhealthsecurity.org/event201/>

In March of 2021, the Nuclear Threat Initiative conducted a mock exercise of a monkeypox pandemic that spreads across the world. Coincidentally, they were right again, since authorities now claim a monkeypox virus is actually spreading. Wow, these people are magical with their mock exercises.

<https://www.nti.org/analysis/articles/strengthening-global-systems-to-prevent-and-respond-to-high-consequence-biological-threats/>

Here's a link to a mock pandemic (SPARS) developed by Johns Hopkins University. This exercise was completed in 2017 and involved a response to a novel coronavirus originating from Southeast Asia. This one hasn't happened...yet.

<https://www.centerforhealthsecurity.org/our-work/Center-projects/completed-projects/spars-pandemic-scenario.html>

<https://www.bitchute.com/video/FvvWMSD0VRbX/> (Mike Adams discusses the SPARS script.)

In October of 2022, the Bill and Melinda Gates Foundation, Johns Hopkins University and the World Health Organization conducted another mock pandemic called Catastrophic Contagion. This time around, this “exercise” covered the spread of a respiratory illness with a higher fatality rate than Covid that targets young people and children. Thus, no one should be surprised when it happens again. Bill Gates did say [this](#) about getting people’s attention with the next pandemic.

<https://www.centerforhealthsecurity.org/our-work/exercises/2022-catastrophic-contagion/>

FORETELLING OF THE COVID PANDEMIC

This is the statement from Bill Gates in 2010 saying, “If we do a good job with new vaccines, health care and reproductive services, we can lower the world population by 10-15%.” Start at 4:25.

https://www.ted.com/talks/bill_gates_innovating_to_zero

Dr. Fauci made a definitive statement in 2017 that a surprise infectious disease outbreak will occur during the Trump presidency. He was completely right, but how did he know for certain?

<https://rumble.com/vp8k7c-anthony-fauci-predicts-pandemic-2017-georgetown-keynote-address.html>

A couple of months before the pandemic, Dr. Fauci and others discussed the creation of a disruptive event that wouldn’t be restricted by governments. They spoke about a novel virus deriving from China and how that RNA sequence could be beamed across the world. Coincidentally, the Covid genome sequence is now beamed across the world to hospitals and doctors, as viral isolation is not encouraged or recommended by the World Health Organization.

<https://www.bitchute.com/video/sHeR0yaBx4uH/>

The National Institutes of Health authored evidence that the US (via the National Institute of Allergy and Infectious Diseases which is led by Dr. Fauci) funded gain-of-function research in Wuhan, China, the place where the pandemic started. Gain-of-function research strives to make viruses or pathogens more transmissible and/or deadly. Dr. Fauci vehemently denied this under oath before Congress.

<https://theintercept.com/2021/09/09/covid-origins-gain-of-function-research/>

In this old video from 1995, Dr. Pierre Gilbert predicts that a mandatory vaccination will create mind-controlled zombies who’ll receive electromagnetic signals.

<https://www.bitchute.com/video/g2UOYbt5D62H/>

VAERS INFORMATION

Below is a link to VAERS (Vaccine Adverse Events Reporting System). This system tracks injuries and deaths from all vaccines since 1990, including the Covid shots. Based on this system and the Harvard study below, the Covid shots have potentially killed and/or injured millions of people.

According to VAERS, the Covid shots have killed roughly three times more people than all the other vaccines combined since 1990. (*As of June 25th of 2022, Covid vaccines potentially caused 29,031 deaths compared to 9,555 deaths from all the other vaccines combined since 1990. These numbers only represent less than 1% of the actual Covid injuries and deaths.*)

Drs. Fauci and Walensky claim VAERS reports aren’t confirmed, but Covid deaths and cases aren’t confirmed either, all while posting those numbers everywhere. Also, filing a VAERS report is laborious, taking roughly 30 minutes to complete. Who would waste time filing fake reports?

<https://www.openvaers.com/covid-data>

This [Harvard study](#) found that less than 1% of vaccine injuries are reported to VAERS. This is why the Covid shots have potentially injured and/or killed millions of people around the world, using the captured cases in VAERS.

Any study using only the VAERS numbers (without considering the underreporting of Covid injuries and deaths) is a bogus study. Some of CDC's studies made this mistake. I wonder why CDC wasn't responsive to this Harvard study at the end. Also, [health care workers are admitting](#) that they never heard of VAERS, so it's clear that many vaccine deaths and injuries aren't being reported.

<https://digital.ahrq.gov/ahrq-funded-projects/electronic-support-public-health-vaccine-adverse-event-reporting-system>

This sworn lawsuit from a CMS (Center for Medicaid Services) worker states VAERS data are grossly underreported. This person indicates that vaccine injuries and deaths are being removed or hidden in VAERS. When this form was filed on July 19th of 2021, this person said there were roughly 45,000 deaths that had been reported to VAERS. Now consider the fact that fewer than 1% of injuries and deaths are even captured in VAERS.

<https://renz-law.com/45k-whistleblower-suit>

When asked about the death and injury reports in VAERS, Drs. Walensky and Fauci refused to admit that the Covid shots cause serious illness and death. Their ridiculous example was eerily dismissive. Ironically, people who died from [gunshot wounds](#) and [motorbike crashes](#) were listed as Covid deaths.

<https://www.bitchute.com/video/9X5f1R6D99Df/>

CLINICAL TRIAL DATA AND STUDIES ON THE COVID VACCINES

This article discusses Pfizer's vaccine clinical trial. Less than 1% of people in the placebo group developed symptomatic Covid infection. They used relative risk versus absolute risk reduction, which brought them to their 95% effective "talking point." FDA recommends using absolute risk reduction, as relative risk reduction misleads people into thinking they have more protection with the vaccine. Also, this study didn't measure asymptomatic infection and transmission rates between the vaxxed and unvaxxed. There was no significant difference in mortality between the vaxxed and unvaxxed.

<https://www.nejm.org/doi/full/10.1056/nejmoa2034577>

<https://www.bitchute.com/video/bA7qKXf0z07u/> (absolute risk reduction vs. relative risk reduction)

This CDC page covers clinical trial data for the Pfizer vaccine. In summary, vaxxed people experienced significantly more symptoms from taking the shot compared to those in the placebo group. If the argument is that the vaccine prevents people from being hospitalized, vaxxed people got more symptoms upfront from taking the shot compared to unvaxxed people who were slightly more likely to get symptomatic Covid infection. It would be good to learn if people are more likely to be hospitalized from taking the shot compared to those who develop symptomatic Covid infection.

<https://www.cdc.gov/vaccines/covid-19/info-by-product/pfizer/reactogenicity.html>

This study found that people who took Covid shots were 27 times more likely to catch Covid compared to those with natural Covid immunity. Vaxxed people were also more likely to be hospitalized from Covid compared to those with natural immunity. Of the 9 people hospitalized from Covid in the study, 8 of them were vaxxed.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC9047157/>

This study found that 94% (948 out of 1,006) of vaxxed people had blood that showed clotting, irregularities and objects of unknown origin. The blood samples of 12 of them were collected beforehand, in which their blood was normal before receiving the shot.

<https://ijvtp.com/index.php/IJVTPR/article/view/47>

Among the known outcomes for pregnant women in Pfizer's clinical trial, 82-97% of them who were vaxxed lost their baby. These results aren't complete, since Pfizer didn't know the outcomes for 238 of the 270 pregnant women in their trial. In addition, CDC also performed a study on pregnant women who took Covid shots, and when assessing for the women who took a shot in the first or second trimester, 82% of them suffered a miscarriage too. This is appalling.

<https://expose-news.com/2022/08/15/9-in-10-covid-vaccinated-women-lose-baby/>

This study found trace amounts of the mRNA shots in the breast milk of breastfeeding mothers. This finding presents so many questions and concerns, specifically the extent of the biodistribution of the shots throughout the body and the health effects of these spike proteins in newborn babies and in various organs.

<https://jamanetwork.com/journals/jamapediatrics/fullarticle/2796427>

Steve Kirsch, who's the Executive Director for the Covid-19 Early Treatment Fund, presents clinical trial data from Pfizer's Phase 3 trial. Among those who took the shot, results show there was no statistically significant benefit in reducing mortality, while showing a statistically significant increase in morbidity. In addition, all-cause mortality rates were higher in those who were vaxxed in the trial.

<https://www.bitchute.com/video/RatSHEvvD0AE/>

Dr. Clare Craig summarizes results from Pfizer's vaccine trial for children. Six vaxxed children had severe Covid compared to 1 unvaxxed child. One child was hospitalized, and that child was vaxxed. Throughout the study, vaxxed children caught Covid more than the unvaxxed ones until the end of the study. Also, vaxxed children were more likely to catch Covid twice in the trial.

<https://rumble.com/v18s66i-bombshell-dr.-clare-craig-exposes-how-pfizer-twisted-their-clinical-trial-d.html>

This study found that Pfizer's Covid shot reverse transcribes and installs DNA into the human genome. Authorities said this wasn't possible with the shots. Dr. Peter McCullough discusses it [here](#).

<https://www.mdpi.com/1467-3045/44/3/73>

This clinical trial is studying the safety, tolerability, immunogenicity and efficacy of Covid mRNA vaccines. This trial started in April 2020 and ends in Feb. 2024. If "science" has already proven these shots to be safe and effective, why are clinical trials like this still taking place? Why would officials give any therapy to the mass public that's still being studied?

<https://clinicaltrials.gov/ct2/show/NCT04368728>

To date, more than 1,000 peer reviewed articles have been published regarding injuries and deaths from the Covid shots.

<https://community.covidvaccineinjuries.com/compilation-peer-reviewed-medical-papers-of-covid-vaccine-injuries/>

Dr. Joseph Ladapo, the Surgeon General for Florida, released official guidance for young males to stop receiving the Covid shots after finding an 84% increase in cardiac related deaths among males between 18-39 years old within 28 days of getting a Covid shot.

This study found that many women experienced menstrual irregularities after getting the Covid shot. Among women with regular menstrual bleeding before the shot, 42% of them bled heavier after the shot, while 66% of postmenopausal women experienced bleeding again after getting the shot.

This study found that Covid shots impair the reproductive ability of vaxxed men.

<https://onlinelibrary.wiley.com/doi/epdf/10.1111/andr.13209>

This study, endorsed by the World Health Organization, found that vaxxed people are more than 300 times more likely to suffer a serious vaccine injury than be hospitalized from Covid infection. This answers the question that was asked [here](#).

This study found that people in the United Kingdom (over 18 years old) who took three Covid shots were in the negative with Covid complications, meaning they were more likely to experience Covid infections, hospitalizations and deaths compared to the unvaxxed population since December 2021.

<https://www.medrxiv.org/content/10.1101/2022.06.28.22276926v3>

This study found that young boys and men younger than 30 years old (who received the mRNA shots) were roughly 133 times more likely to develop myocarditis than unvaxxed men/boys in the population.

PCR TESTING AND BOGUS COVID DATA

Dr. Kary Mullis who created the PCR (polymerase chain reaction) test and won a Nobel prize for it mysteriously died a few months before the pandemic started. He was a critic of Dr. Fauci, even challenging him to debates. He said Fauci didn't know anything about anything. (2nd link) He also stated that the PCR test should never be used to diagnose clinical infections.

<https://www.bitchute.com/video/jKDEU6hYQH8M/>

This video discusses the issue of PCR cycles and how most of the Covid PCR tests are running more than 35 cycles to diagnose Covid, rendering the results completely useless.

<https://www.bitchute.com/video/faVvZj2vgW5g/>

These researchers performed a meta-analysis to determine the percentage of Covid cases that were asymptomatic. Surprisingly, they found a wide range of results. Asymptomatic Covid cases ranged from 4%-80% across the different studies, showing no real consistent mark. This may be the case, since PCR testing was never an appropriate tool to diagnose clinical infection.

<https://www.cebm.net/covid-19/covid-19-what-proportion-are-asymptomatic/>

In January of 2021, the World Health Organization released this memo to doctors and medical staff across the world, instructing them to be weary of Covid false positives. This memo instructed medical staff to be more diligent before listing someone as Covid positive. It indirectly stated that false

positives can occur using high PCR cycles, and that clinical symptoms should be present before listing someone as Covid positive. Covid cases and deaths dropped dramatically after this.

<https://www.who.int/news/item/20-01-2021-who-information-notice-for-ivd-users-2020-05>

The Bulgarian Pathology Association stated that PCR tests for Covid are scientifically meaningless.

<https://bpa-pathology.com/covid19-pcr-tests-are-scientifically-meaningless/>

This FDA document indicates that scientists didn't use the actual Covid virus to calibrate their PCR test. Therefore, many question the validity of the PCR tests around the world for truly detecting Covid. See pg. 40: *No quantified virus isolates of the 2019-nCoV were available for CDC use at the time the test was developed.*

<https://www.fda.gov/media/134922/download>

The scientists who calibrated the PCR test to diagnose Covid made this statement in the background section of their paper: "*We designed candidate diagnostic RT-PCR assays before release of the first sequence of 2019-nCoV.*" This essentially means that they calibrated the PCR test for Covid detection before Covid's genome sequence was even released publicly. This is completely unscientific.

<https://www.who.int/docs/default-source/coronaviruse/protocol-v2-1.pdf>

FDA states that: *the detection of viral RNA (via PCR) may not indicate the presence of infectious virus or that 2019-nCoV is the causative agent for symptoms.* (pg. 38, 3rd bullet point) The sixth bullet point down states that: *the test can't rule out diseases caused by other bacterial or viral pathogens.*

<https://www.fda.gov/media/134922/download>

Dr. Wu Zunyou from the Chinese CDC states that they never isolated the Covid virus.

<https://www.youtube.com/watch?v=wWy08p7pUpA>

The World Health Organization (WHO) shared this report with countries and stakeholders, where they provide the following recommendation on page 3 under "Viral Culture": *Virus isolation is not recommended as a routine diagnostic procedure.* Why would WHO discourage other countries or entities from isolating the virus to ensure it's the thing that's causing sickness in patients?

<https://apps.who.int/iris/bitstream/handle/10665/331501/WHO-COVID-19-laboratory-2020.5-eng.pdf?sequence=1&isAllowed=y>

CDC no longer recommended its PCR test for Covid detection after 12/31/21. That was odd to many.

PFIZER VACCINE INJURIES AND VACCINE SHEDDING

Here's Pfizer's Adverse Events Report. (2/28/21) Over 1,200 different types of vaccine injuries were reported just during the first three months of the vaccine rollout. (Listed on page 30) Of course, this was downplayed by the mainstream media.

<https://phmpt.org/wp-content/uploads/2021/11/5.3.6-postmarketing-experience.pdf>

Pfizer hired 2,400 new employees to process the "large number of adverse events" that occurred during the first three months of their vaccine rollout. That doesn't sound too safe.

Pfizer made the following statement in its clinical report on "vaccine shedding" or how the vaxxed can be occupational hazards to the unvaxxed on pg. 69:

An occupational exposure occurs when a person receives unplanned direct contact with the study intervention, which may or may not lead to the occurrence of an adverse event. Such persons may include health care providers, family members, and other roles that are involved in the trial participant's care. (It essentially referred to vaxxed participants as occupational hazards.)

CDC STUDIES OR STATEMENTS WITH ERRONEOUS LOGIC

This CDC article reports that the benefits of Covid shots outweigh their risks regarding myocarditis. It's perplexing that CDC would perform a risk/benefit analysis by only evaluating one vaccine risk, that being myocarditis. There are hundreds of other risks associated with the shots. CDC would need to include all risks associated with the shots to be more accurate.

Also, this study only used myocarditis data from VAERS, and it's known that VAERS only captures less than 1% of all vaccine injuries. So this assessment isn't close to being accurate or complete. How CDC determines the vaccine benefits with bogus PCR cases and deaths is also problematic.
<https://www.cdc.gov/mmwr/volumes/70/wr/mm7027e2.htm>

This KFF (Kaiser Family Foundation) study presents misinformation about hospitalizations and deaths based on vaccine status. The study states that unvaxxed people are more likely to be hospitalized or die, but it included those who were *partially vaccinated* and those with an *unknown vaccine status* in the unvaxxed group. This clearly biased the results by combining three groups into one. Why didn't they list separate columns and rates per group? This was incredibly deceptive.

Also, this study presented an unorthodox manner of collecting Covid data, which was clearly inconsistent and confusing. So many errors can be highlighted, but the study correctly stated that the deaths in the results may not be caused by Covid. Keep in mind that this poor study jumpstarted the "pandemic of the unvaccinated" movement.
<https://www.kff.org/policy-watch/covid-19-vaccine-breakthrough-cases-data-from-the-states/>

In 2020, CDC released a report with data showing that 94% of Americans who allegedly died from Covid had on average 2.6 additional comorbidities that may have contributed to their death. Stating people absolutely died from Covid, using faulty PCR tests and incentives for doctors and hospitals to mark Covid on death certificates, is irresponsible and unethical. There are even reports of medical personnel giving Covid tests to patients after death.
<https://www.jems.com/coronavirus/cdc-report-underlying-conditions-94-percent-covid-19-deaths/>

This presentation, from a CDC doctor representing a Covid-19 Planning Unit, isn't erroneous but revealing. This presentation was made in September of 2020, where the doctor clearly showcased (on slide 8) a preliminary list of "adverse events of special interest" regarding the Covid shots. This list included death, Covid-19 disease, myocarditis, transverse myelitis, stroke, autoimmune disease and many other illnesses. Ironically, the FDA presented a similar list of potential injuries from taking the Covid shots. However, both agencies continued to shout the safety of these shots, even though they clearly knew the shots could cause serious harm in a myriad of ways. Most people knew nothing of these risks before taking the shots.
<https://www.cdc.gov/vaccines/acip/meetings/downloads/slides-2020-09/COVID-03-Shimabukuro.pdf>

This CDC study is a prime example on how flawed vaccine registries and data massaging may have biased the results. This study presents favorable data for the shots preventing hospitalization, but to its credit, it lists many study limitations, stating that the vaccine effectiveness rates were imprecise and should be interpreted with caution. Without sound vaccine data, these studies hold little weight.

In the fifth paragraph, data massaging appeared to occur with excluding certain patients for the analysis. Only 25% of the eligible patients were included in the study, and no explanation was given on how they were chosen. An additional 7,500 patients were also excluded without reason. A sound statistician can manipulate data and include certain patients to get the desired results.

Moreover, no explanation was given on why the unvaxxed patients were in the hospital. Just know that unvaxxed patients are tested more often than vaxxed patients and are usually in the hospital for other reasons besides Covid. In Table 1 of the study, they included substantially more unvaxxed patients in this study who tested both positive and negative for Covid. Again, it appears that data massaging occurred to get the desired results, which contradict completely with this [study](#). This CDC study also used data from vaccine registries, and for insight on this tricky topic, click [here](#).

<https://www.cdc.gov/mmwr/volumes/71/wr/mm7115e2.htm>

This CDC study on breakthrough cases also used smoke and mirrors to give the desired illusion. Even though the PCR test is erroneous, this study claimed that only a small fraction of vaxxed people experienced a breakthrough infection in the US. However, the study listed the following statement as a limitation which says everything—*"The number of reported COVID-19 vaccine breakthrough cases is likely a substantial undercount of all SARS-CoV-2 infections among fully vaccinated persons. The national surveillance system relies on passive and voluntary reporting, and data might not be complete or representative."* Nothing else needs to be said here.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7021e3.htm>

CDC lies by stating that there are only four serious outcomes from Covid vaccines. They keep using the word "rare." If a legitimate tracking system isn't in place, how does one know if these injuries are rare or not? VAERS only captures less than 1% of all vaccine injuries/deaths.

<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/safety/safety-of-vaccines.html>

If a person gets a Covid vaccine and is hospitalized within 14 days, that person is still considered unvaxxed in this study. These studies never attempt to associate vaccine administration with a person getting sick or being hospitalized. They direct all attention to their unvaxxed status, which is deceptive.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7034e5.htm>

CDC's surveillance system for monitoring Covid breakthrough cases and deaths was passive, meaning that health departments voluntarily reported their state's breakthrough cases to the CDC. It also appears that not all health departments participated in this process. Thus, the system for monitoring breakthrough cases was never consistent. Again, the PCR tests are pointless, but it's notable to mention that CDC's method for tracking vaccine effectiveness was inept.

<https://www.cdc.gov/coronavirus/2019-ncov/php/hd-breakthrough.html>

Nearly half of those who allegedly died from Covid also had flu or pneumonia, so what really killed them? Also, how does a doctor know what "initiated the chain of events" if one has 3-8 comorbidities?

<https://www.cdc.gov/nchs/covid19/mortality-overview.htm>

CDC does not require a positive PCR test or laboratory confirmation for Covid to be listed as the underlying cause of death on death certificates. Even though the PCR tests are pointless, this caveat is notable. This finding also challenges Covid death data that are presented by CDC and others.

https://www.cdc.gov/nchs/nvss/vsrr/covid19/tech_notes.htm

<https://www.bitchute.com/video/LWUuOWZkewHO/> (Dr. Bukacek discusses this baffling issue.)

This CDC document shares guidance on how doctors should certify Covid on death certificates, clarifying that a positive PCR test or lab confirmation isn't needed. On page 2, it reads: *"In cases where a definite diagnosis of COVID-19 cannot be made, but it is suspected or likely (e.g., the circumstances are compelling within a reasonable degree of certainty), it is acceptable to report COVID-19 on a death certificate as "probable" or "presumed." In these instances, certifiers should use their best clinical judgement in determining if a COVID-19 infection was likely."*

<https://www.cdc.gov/nchs/data/nvss/vsrg/vsrg03-508.pdf>

CDC did not share large amounts of Covid data with the public during the pandemic, citing the data weren't ready for primetime and that other political agencies had to approve it first. Essentially, it appears that CDC cherry picked and shared data that fit the desired political narrative.

CDC removed their original claim that the injected mRNA and spike proteins don't last long in the body. Now, people must wonder the health effects of having mRNA and spike proteins in their body for extended periods of time, especially when no long-term studies were done with these shots.

In August of 2022, CDC changed many of its Covid recommendations regarding masking, social distancing, isolation and testing. The new guidelines roughly treat vaxxed and unvaxxed people the same. This confused many citizens, since the original guidelines were allegedly based on science. Then when [checking Covid cases in the US](#) from March 2022 to August 2022, cases had actually climbed in the US. That's strange. Why would the CDC now alter their recommendations?

<https://www.webmd.com/lung/news/20220811/cdc-ends-some-covid-safety-rules-emphasizes-personal-risk>

Dr. Walensky admitted that the CDC made huge mistakes during the pandemic, and that major changes are occurring. Even though this is admirable, many people don't think this is nearly enough considering the huge errors and false talking points that were made. Truly "following science" wouldn't lead to that many errors, so many are calling for the CDC to be disbanded or defunded.

<https://www.youtube.com/watch?v=GpUZzFC7M88>

CDC's Covid tracker mistakenly counted more than 72,000 deaths as Covid deaths. Even though CDC corrected this mistake, they didn't mention how long this mistake had been there. In combination with the other data and communication issues from the CDC, its credibility has completely plummeted.

<https://www.theguardian.com/world/2022/mar/24/cdc-coding-error-overcount-covid-deaths>

ICAN (Informed Consent Action Network) won a lawsuit against the CDC, resulting in a court order requiring the CDC to release vaccine injury data captured in its v-safe phone app. Of the 10 million

people who used the v-safe app, roughly 7.7% of them sought medical care and 25% experienced serious symptoms after taking the Covid shots. Why didn't the CDC release these data sooner?

FLAWED DATA FROM VACCINE REGISTRIES

Vaccine registries in Texas are outdated and inaccurate. One pharmacy in Texas learned that 500 administered Covid shots weren't showing in the system. This was just one location, so imagine the inaccuracy of vaccine registries in whole. Then imagine how public health studies use these registries to determine if vaxxed or unvaxxed people are more likely to die or be hospitalized. These vaccine registries are broken.
<https://www.texastribune.org/2021/01/20/texas-coronavirus-vaccine-data/>

CDC confirms that vaccine registries for Georgia and other states are flawed, so any study using their data should be questioned. This is important when reviewing the CDC Covid results depicting unvaxxed people to have higher rates of everything. (2nd link) CDC receives vaxxed data for their analyses through state-based vaccine registries.

<https://www.nhpr.org/nh-news/2021-11-02/nh-covid-19-data-inaccurate>

This article tackled the reality that many states and registries aren't properly collecting Covid vaccination data, making it difficult to use that data to determine shot effectiveness or efforts.
<https://time.com/5934095/covid-vaccine-data/>

Dr. Peter McCullough provides sound information on why CDC's data show the Covid shots reduce hospitalizations in the US. Covid vaccine data from nearly every other country show the opposite results. Potential reasons for the US vaccine results are: unvaxxed people are tested more than vaxxed people and are usually in the hospital for other reasons besides Covid.
<https://www.bitchute.com/video/sE2ZKxjmB6Xh/>

CDC stated that vaxxed people can largely skip Covid testing, since they stopped tracking breakthrough cases, occurring when a vaxxed person tests positive for Covid. This clearly biased the data, almost ensuring that unvaxxed people would have much higher rates of Covid hospitalizations.

Covid Vaccination Misinformation

CDC and the media propose that nearly 80% of people in the US took at least one Covid shot. However, many people don't know that many authorities confronted the CDC about these numbers being false. For example, CDC's vaccination tracker showed that 99.9% of senior residents in 21 states had at least one shot, which is completely untrue. Below are three articles discussing this issue with quotes from many health authorities.

<https://www.webmd.com/vaccines/covid-19-vaccine/news/20211209/us-vaccine-rates-overestimated>

<https://pubmed.ncbi.nlm.nih.gov/34880504/>

CDC even posted the following statement on their site about their inflated vaccination numbers: *"When possible, CDC links a person's first, second, and booster doses together. However, linking is sometimes not possible because CDC does not receive personally identifiable information about vaccine doses. This can lead to over-estimates of first doses."* (Click the link right above the vaccination table to see this disclaimer.)

This Washington Post article presents a finding from the Kaiser Family Foundation (KFF), showing that 58% of Americans who died from Covid in August of 2022 were vaxxed or boosted. KFF was the same group that published the bogus data [here](#). This provocative title may seem like a victory for the unvaxxed, but the article still proclaims that being vaxxed is far better.

As stated throughout this report, please know that CDC's methodology for diagnosing and tracking Covid cases and deaths was never consistent or accurate. CDC even admits to not tracking breakthrough cases well, so how can they confidently make these grand statements with this sketchy data. Even with this bogus data, the Covid death rate differences by vaccination status aren't statistically significant. For some reason, they wanted to put vaxxed Americans back on their heels, maybe to scare them into taking the bivalent booster shots.

<https://www.washingtonpost.com/politics/2022/11/23/vaccinated-people-now-make-up-majority-covid-deaths/>

CDC's former Director (Dr. Redfield) states the notion, of fully vaxxed people rarely dying from Covid, isn't true and that more than 40% of people who died during a 2-month period in Maryland were fully vaxxed. This statement was made in late 2021.

THE PANDEMIC WAS INCENTIVIZED.

This site summarizes how much federal money each state received per Covid case. West Virginia received \$471,000 per Covid case. Drs. Pierre and Blaylock explain how hospitals receive seven different forms of payment from the government by testing, diagnosing, treating (only with Remdesivir) and listing Covid on death

certificates of patients. It's estimated that hospitals receive roughly \$100,000 per Covid patient. This clearly incentivizes the misdiagnosis and mistreatment of patients, especially for struggling hospitals. <https://rumble.com/vwp9on-the-great-reset-is-biden-administration-paying-hospitals-to-kill-covid-19-p.html> (Dr. Pierre)

Immunizers are being paid significantly more money to administer Covid vaccines than previous ones. Starting in 2021, the new payment rate increased from \$28 to \$40 for administering single-dose Covid shots and from \$45 to \$80 for administering double-dose Covid shots. This payment incentive could clearly sway immunizers from giving informed consent to people. The vaccine inserts are also blank, making this incentive an even bigger problem.

<https://www.pharmacytimes.com/view/ncpa-applauds-higher-medicare-reimbursement-for-covid-19-vaccines>

WEIRD NEWS ON THE FOOD AND DRUG ADMINISTRATION

Before the shots were administered and mandated, the Food and Drug Administration (FDA) shared this list of possible injuries from taking Covid shots, including deaths, strokes, seizures, myocarditis, pregnancy complications and many others. See slide 16. They always knew and still proceeded without telling the public.

CHANGE OF HEART: MRNA TECHNOLOGY AND DR. MALONE

This page describes the functions of mRNA or messenger RNA technology. Essentially, the injected mRNA instructs your cells to create certain proteins, which supposedly induce the desired immune responses in your body. In Covid's case, the shots program your cells to create spike proteins.
<https://www.webmd.com/children/vaccines/ss/slideshow-mrna-technology>

Dr. Robert Malone created and/or discovered mRNA technology, being used in many of the Covid shots. Watch the link below. He also warns parents against giving mRNA shots to their children [here](https://www.youtube.com/watch?v=GOdjy35l3Q4).
<https://www.youtube.com/watch?v=GOdjy35l3Q4>

Dr. Robert Malone and over 17,000 doctors/scientists declare that the Covid vaccines must end based on their ineffective nature of preventing infection, replication and transmission. They also state that vaxxed people are more likely to get infected, have a disease or die compared to unvaxxed people.
<https://www.bitchute.com/video/NEMxEbmtlu6s/>

Dr. Robert Malone discusses the dangers of the mRNA shots. These shots can cause antibody dependent enhancement (ADE) or pathogenic priming, where the body overly reacts to future infections or pathogens, causing inflammation throughout the body. Also, spike proteins from mRNA shots can cause blood clotting and microcoagulation.
<https://www.bitchute.com/video/YZHdITTJ9s1I/>

Dr. Robert Malone confers that the Covid shots are failing, being that 9 out of 10 people in Great Britain or England who died from Covid were vaxxed, based on this [data report](https://www.bitchute.com/video/ax7L9dAbblk1/).
<https://www.bitchute.com/video/ax7L9dAbblk1/>

Dr. Fauci clearly outlines how the Covid shots may cause antibody dependent enhancement like other vaccines did, and the only way to learn this is by doing an extended study with people in the public. So using his words, vaxxed people are in a global experiment, which may prove to be deadly.
<https://rumble.com/v13ewa5-fauci-on-antibody-dependent-enhancement-ade.html>

This published article discusses antibody dependent enhancement in correlation with vaccines in more detail. It also details how previous studies using mRNA vaccines to prevent viral infections failed, resulting in the death of many animals.

Here are the dangers of Polysorbate 80 (P80), an ingredient in the J&J shot. It's in many foods, and studies found that people consuming high amounts of P80 may experience chronic inflammation and/or tumor development. Also when injected, P80 can cross the blood-brain-barrier, which may explain the high number of brain clots with the J&J vaccine.

REMDESIVIR AND OLUMIANT: POTENTIAL KILLERS FOR COVID PATIENTS

Dr. Bryan Ardis discusses how the FDA and Fauci only recommend Remdesivir to treat Covid patients and children, even though it had an over 50% death rate on Africans in the Ebola clinical trial. The safety board even discontinued the use of Remdesivir in that trial. So how many “Covid deaths” can be attributed to patients receiving Remdesivir in hospitals?

<https://rumble.com/vzyrgx-dr.-bryan-ardis-remdesivir-had-50-death-rate-in-africa-trials.html>

This is the study that shows that 53% of Ebola patients receiving Remdesivir died, which resulted in the drug being discontinued in the trial. That 53% death rate is higher than the death rate for Ebola. Click [here](#) to read a broader analysis of this study.

In the largest trial to study the benefits of Remdesivir with treating Covid, no benefit was shown. However, the results from two Gilead-sponsored studies were used instead, even though Gilead is the manufacturing company that produces Remdesivir. FDA didn't seek the expertise of other unions and agencies before approving this drug.

Biden's Covid Czar (Dr. Jha) made the following remark in Dec. 2022, "There's no study in the world that shows that masks work that well." This is interesting, since many studies in 2020 and 2021 stated that masks work well against Covid transmission. Did you know? Flu shots given each year to the general public have very little to no effectiveness. From 2018-2019, the flu vaccine effectiveness rate (for A or B flu strains) for all age groups in the US was just 29%, while being worse for those older than 65 at 12%. For the H3N2 flu strain, the vaccine effectiveness rate was just 9% with a confidence interval including -4, meaning that in reality, people who took the flu shot may have been more likely to get sick with this flu strain than those who didn't take the flu shot. The authorities won't tell you that.

IS 5G TECHNOLOGY RELATED TO THE COVID PANDEMIC?

Twenty-six thousand scientists signed a petition opposing the roll out of 5g (fifth generation) technology across the world, indicating that such rollout would have a devastating impact on human health. They stated it could cause flu-like symptoms across the globe.

<https://principia-scientific.com/petition-26000-scientists-oppose-5g-roll-out/>

This 2018 article announced that Wuhan would build 5g stations around the city, covering every city corner by the end of 2020. This is around the same time the Covid pandemic started.

http://en.hubei.gov.cn/news/newslist/201804/t20180416_1275769.shtml

When comparing the 5g distribution map to the Covid case map of the world, an overlap clearly occurs. It appears places with the greatest 5g distribution also had the highest Covid cases on the map. The United States, Europe, Brazil, Israel and parts of China have the greatest distribution of 5g, while also experiencing the most Covid cases. Conversely, places like Russia and Africa have minute amounts of 5g distribution and the fewest Covid cases. Maybe the 26,000 doctors were right.

Ridiculous incentives were offered to coerce people into getting the Covid shots. These incentives included: money, unhealthy foods (like pizza, burgers, fries, hotdogs and Krispy Kreme donuts), lottery tickets, alcoholic beverages and marijuana joints.

FEAR AND MIND CONTROL TACTICS OF THE COVID PANDEMIC

Fear tactics and threats were issued by government and scientific figures against any person who opposed, questioned or mistrusted the Covid narrative. No alternative opinions were allowed. Many people, including legitimate scientists, were banned from multiple platforms. Continuing to show inflated Covid cases and deaths was probably the greatest fear tactic used. CNN's Technical Director discusses how networks use death data and fear in their programming. <https://www.bitchute.com/video/j3WW55Y6ZE7k/>

The media repeatedly showed sick patients in hospitals who were unvaxxed. The media would always encourage them to discuss regrets with not getting the shot. This was clearly done to put fear in the unvaxxed population. However, viewers don't know the circumstances of these patients, especially when the PCR test is erroneous with diagnosing Covid infection. Also, when the shot doesn't prevent transmission, an unvaxxed person poses no additional risk to those who took the shot. If one is swayed with personal stories of pain and death, see the [Covid Vaccine Injuries section](#) below. <https://www.youtube.com/watch?v=JhfrBLQIVCs> (24 year-old sick father) <https://www.youtube.com/watch?v=pd8P12BXebo> (Sick patients in the Ozarks)

THE RACE ANGLE ON COVID AND THE VACCINES

Even though PCR tests are inaccurate, no significant racial disparities for Covid seem to exist for Blacks, while whites, Hispanics and American Indians consistently had higher Covid rates.

<https://covid.cdc.gov/covid-data-tracker/#demographicsovertime> (Click on the race/ethnicity tab.)

Regarding link below: Even though PCR tests are inaccurate, the Covid death rates by race/ethnicity are similar to each group's population percentage in the US, indicating no major disparities by race. (This is an example on how authorities were initially determining Covid disparities by race [here](#).)

Using CDC's initial disparity standard (which is now strangely removed from their site) and as of July 2022, the Covid death rate for whites was 2.5% higher than their population percentage compared to just 1% higher for Blacks. (whites: 62.6% and 60.1%) (Blacks:13.5% and 12.5%)

These findings contradict with earlier reports stating that Blacks had massive disparities regarding Covid cases and deaths. Also, know that these Covid databases lack sufficient amounts of racial data, and that there may be bias in how health care professionals collect and report Covid data by race/ethnicity.

<https://covid.cdc.gov/covid-data-tracker/#demographics>

Early in the pandemic, articles like this one were published everywhere, saying that Blacks were enormously more likely to get and die from Covid. This fear tactic was probably used to summon Black cooperation, since Blacks mistrust the US system the most. If you check these cities now and their Covid disparities, they look nothing like these initial reports. Data massaging is an art form.

This satirical commercial is accurate with its depiction of the Covid narrative.

This grandma shares wisdom with her grandchildren about the Covid shots. Her wisdom seems effortless and without the help of the internet.

I wonder who writes the one script used by most media programs.

FINDINGS AND QUESTIONS THAT CHALLENGE OR DEBUNK THE COVID NARRATIVE

- No one knew or knows the long-time impact of taking the Covid shots. Many deaths and injuries have already occurred among people who took the Covid shots. However, these deaths and injuries are being silenced. Will the long-term effects of taking the Covid shots be worse than the short and mid-term effects?
- Dr. Fauci and others made several statements indicating that the Covid pandemic was planned and calculated. Event 201 was a great coincidence. Why did the masses of people not believe them? Will they do it again?
- According to VAERS, the Covid shots have potentially killed roughly three times more people than all the other vaccines combined since 1990. Shouldn't this be enough to stop the Covid shots?
- While the CDC dismisses VAERS, the CDC and FDA don't possess and didn't develop a tracking system that sufficiently tracks deaths and injuries from taking the Covid shots. Why wasn't this a priority? How do they know that deaths and injuries from the Covid shots are rare, if an efficient tracking system isn't in place?
- The FDA and CDC both made presentations in 2020, showing that the Covid shots can cause major health issues such as death, Guillain-Barre syndrome, myocarditis, strokes, clotting problems, pregnancy complications, autoimmune disorders and many other issues. Why were these potential issues not shared with the masses of people during the shot rollout?
- When presented with "freedom of information" requests, why have governments and public health agencies not provided written proof that the Covid virus exists? This shouldn't be a problem. Not doing so opens the door for people to believe that the virus doesn't exist.
- The PCR test is a tool that can't diagnose clinical disease. Even if a PCR test is positive, it can't determine whether or not the positive genome sequence is the material that's causing sickness.

Thus, what are the real numbers of Covid cases and deaths in the US and across the world? This also challenges the clinical trials that used this test.

- Definitions and methodologies are essential. The definitions for “fully vaccinated” and “partially vaccinated” wavered during the pandemic and between studies. How authorities determined Covid cases and deaths was never consistent. The tracking of Covid cases was passive and inconsistent between the vaxxed and unvaxxed, and the CDC even admitted to halting their tracking of breakthrough cases. The vaccine registries are also broken, so how can authorities truly determine the effectiveness of the Covid shots with all of these inconsistencies?
- Why were doctors, scientists and health care personnel heavily castigated or censored from asking questions or providing their own expertise or concerns with the Covid shots?
- Pfizer and Moderna are still releasing tons of data from their clinical trials, and even asked for 75 years to do so. Are they trying to hide something?
- Why did authorities disallow doctors from using ivermectin and other potential therapies to treat Covid when no other therapies were working? We know the approval of ivermectin and other therapies would’ve prevented the emergency use authorization for the Covid shots.
- Why did authorities use mRNA technology to design the Covid shots? This technique to fight coronaviruses in previous clinical studies was never effective, resulting in the death of many animals from antibody dependent enhancement or systemic inflammation.
- Why were doctors encouraged and instructed to list Covid as the underlying cause of death on death certificates without proper confirmation? Ironically, with the PCR test being inadequate for diagnosing Covid, is there an effective tool or test to confirm Covid cases or deaths?
- Entities who heavily endorsed the Covid rollout, such as Bill Gates, Klaus Schwab and the World Economic Forum, constantly discuss the need for world depopulation and a Great Reset via the control and monitoring of people’s biometric data. Are the masses of people aware and fine with this agenda?
- Why would authorities treat Covid like the deadliest disease ever, when it possesses an extremely low fatality rate? The fatality rate even includes the inflated Covid cases.
- The blood of vaxxed people appears to be clotting and clumping, while containing foreign and mechanical material. If these blood pictures are real, are authorities investigating this matter at all or just covering it up?
- Why are embalmers from around the world finding fibrous, lengthy clots inside the bodies of dead vaxxed people? Why is their blood dark and grainy?
- Excess mortality rates have soared in the US and across the world since 2021, even as high as 40% in certain countries and age groups. It makes sense to link this finding to the Covid shots. However, are authorities doing anything to examine this issue and potential link?
- Why are authorities now saying that Covid infections can cause blood clots, myocarditis and even nervous system diseases? It just seems odd and convenient that the authorities, CDC and FDA didn’t mention these links with Covid infections in 2020.
- Why are people (who were injured from taking the Covid shots) gaslighted and ghosted in the mainstream media? Why are they not being treated, compensated and/or heard?

- Many studies and doctors have found the Covid shots to be linked with many health problems such as death, myocarditis, breast milk contamination, menstrual cycle disruption, blood clotting, strokes and hypertension. Therefore, why are they still giving these shots across the world?

FINAL THOUGHTS

The Covid pandemic will be remembered as maybe the worst time in human history, and not because of a virus. This report reviewed clinical studies, articles, documentaries, personal stories and interviews from sources and people across the world. Being a public health professional or doctor isn't necessary to understand the gravity and significance of the results presented. This was clearly a planned pandemic with the intent of harming and killing millions of people across the globe, using fear and mind control tactics. This was never about science or the cessation of a virus. This was always about the boldness of pure evil.

Unfortunately, people fail to see evil, waiting so patiently like a venomous snake to pump poison into the precious and vulnerable veins of the naïve. Maybe they believe the human race evolved with medical technologies, or that the government loves them and would never coerce them into taking medical poisons for their own demise. One can only guess. However, failing to see evil and its gimmicks will only make you a disposable pawn in this universal game of chess.

Humans in totality just represent a combination of good and bad, some mostly good and some mostly bad. However, when merging human flaws with sick governments and factions focused on greed, profit and power, it makes for an amalgamation of factors and events, leading to a certain destruction of society and more importantly, the human spirit.

This pandemic was predicated on killing the spirit of the world, pinching away, piece by piece, the innate ways people live, love, relate and experience it. This pandemic attacked the vulnerable cracks of the human psyche, exacerbating worries, fears, anxieties and lastly hope. It corralled people like animals into spaces, degrading any idea or fact outside the predetermined narrative, while offering prizes for individual compliance, including job security, travel, money, food, drinks, weed and even sex.

However, none of these things compare to the greatest need in the universe, that being social validation or acceptance. This drug alone is more powerful than anything including fear, so evil couldn't resist the opportunity to exploit this biological imperative to sway the masses towards the apple of perceived freedom. In the meantime, those refusing this programming would be labelled anti-vaxxers, conspiracy theorists and/or jerks responsible for the continuation of this designed trauma.

Being able to show others that you joined the vaccine party with stickers and virtue signaling was too much for some to refuse, convincing themselves that the people spewing "safe and effective" from their mouths must truly love them and want the best for them and their families. Let's think not about the sins of this country like Tuskegee and the current system of oppression that millions marched against just two years earlier. Let's just forget and pretend that this system cares dearly for us despite its own admissions and desires for depopulation and world domination via transhumanism and the Great Reset.

This Covid farce is wholly malevolent, as this evil has no limitations or favorites. This evil truly believes it should rule this world of "useless eaters" or the ones remaining after the dark culling, as it waits like a lion for its prey to get weaker and frailer. It's clear that these people are psychopaths and megalomaniacs with god complexes who want to reengineer the world with themselves as rulers and everyone else as their slaves. For now, I can only hope that this report illuminates the truth and agenda of those in power, freeing many from the trappings of this wicked world and need to assimilate into a sick society. It's time to escape this matrix and mania with this empowering information, knowing that righteousness can overcome this calculated doom and prevail with a greater sense of self and purpose at the end of this spiritual clash of good versus evil. Only one question remains now. What will you do?
